

MANIKANTA YENDURU

Phone: +916300561779 | Email: yendurumanikanta@gmail.com | LinkedIn: [Manikanta Yenduru](#) | Github: [Manikanta Yenduru](#)

EDUCATION:

Kalasalingam Academy of Research and Education, Tamil Nadu Aug 2021 – June 2025
Bachelor of Technology in Computer Science and Engineering CGPA: 8.00

EXPERIENCE:

Chegg India Private Limited – Subject Matter Expert (Freelance) Sep 2023 – Oct 2024

- Provided expert-level computer science support, assisting 200+ students in mastering complex concepts including data structures, algorithms, database management, and programming fundamentals.
- Designed 100+ solutions for academic assignments with a 95% approval rate for clarity and accuracy, covering topics in software engineering, AI, machine learning, and computer networks.
- Authored high-quality educational content, increasing user engagement on the learning platform by 10% through detailed explanations, code examples, and step-by-step problem-solving approaches.
- Independently managed projects under tight deadlines, ensuring consistent support quality while maintaining an average response time of under 2 hours for student queries.

Teachnook – Full Stack Intern Jan 2023 – May 2023

- Developed responsive UI components using React.js, HTML, and CSS, enhancing user experience and accessibility across desktop and mobile platforms with a focus on modern design principles.
- Implemented best practices in web design to enhance user experience across multiple browsers including Chrome, Firefox, Safari, and Edge, ensuring cross-browser compatibility and optimal performance.
- Integrated frontend and backend for end-to-end functionality, creating RESTful API endpoints and implementing efficient data flow between client and server components.
- Collaborated with senior developers on code reviews and participated in agile development sprints, contributing to team velocity and product quality improvements.

TECHNICAL PROJECTS:

Behavioral Vision Jan 2024 – Jun 2024

YOLOv4, TensorFlow, React.js, Python, OpenCV

- Developed a real-time crowd behavior analysis system using deep learning with YOLOv4 integrated via TensorFlow for accurate object detection and tracking in video streams, achieving 92% detection accuracy.
- Processed live video data to identify crowd density, movement patterns, and abnormal behavior using client-side AI inference, minimizing backend dependency and reducing latency by 60%.
- Applied advanced algorithms for anomaly detection to assist in public safety, crowd management, and surveillance scenarios, implementing heat mapping and trajectory prediction features.
- Optimized model performance through quantization and pruning techniques, reducing inference time by 45% while maintaining detection accuracy above 90%.

E-Commerce Order Fulfillment System Aug 2023 – Dec 2023

React, Node.js, MongoDB, Express.js, Stripe API

- Built a full stack e-commerce web application with React.js frontend and Node.js backend, implementing JWT-based authentication and role-based access control for admin and customer roles.
- Implemented product catalog, shopping cart, and checkout functionalities with secure payment gateway integration using Stripe API, processing test transactions with 99.8% success rate.
- Used MongoDB for scalable data storage and efficient inventory management, designing optimized database schemas with proper indexing strategies to handle 10,000+ product listings.
- Integrated email notification system for order confirmations and shipping updates, improving customer engagement and reducing support inquiries by 25%.

SKILLS AND INTERESTS:

Programming Languages: Python, Java, SQL, HTML, CSS, JavaScript.

Frameworks & Technologies: Machine Learning, React.js, Node.js, TensorFlow.

Developer Tools & Platforms: GitHub, Visual Studio, Jupyter.

Data Visualization: Power BI, Excel.

Databases: MongoDB.

Coursework: Database Management, Data Structures, Software Methodology, Algorithms Analysis, Artificial Intelligence, Machine Learning, Computer Programming, Mathematics.
